For Immediate Release

AEM elevates capabilities in automation fixtures and device kits by acquiring DB Design Group, Inc.

- **Expands design and application engineering capabilities for AEM’s consumables business**
- **AEM now offers almost 24-hour R&D services to customers leveraging on both US and Asia based teams**
- **Acquisition helps to expand client base to more names in the semiconductor and electronics industries**

Singapore, 22 July 2020 – AEM Holdings Ltd (“**AEM**” or “**the Group**”), a global leader offering application specific-intelligent system test and handling solutions for semiconductor and electronics companies serving advanced computing, 5G, and AI markets, announced that it has acquired 100% stake in California-based DB Design Group, Inc (“**DB Design**”) today.

DB Design is a world-renowned supplier of automation fixtures, device kits, and other test-related products. It has over 30 years of experience in delivering turnkey solutions for virtually all major semiconductor test and handling systems. DB Design has a key team of designers and machinists located in California serving the Silicon Valley customer base.

The acquisition of DB Design provides AEM with several synergies, including:

[a] DB Design’s specialized capabilities expands AEM’s Serviceable Available Market to include the automation fixture and device kit markets.

[b] DB Design’s customer base presents a synergistic growth opportunity for AEM.

AEM Holdings Ltd
52 Serangoon North Ave 4
Singapore 555853

AEM intends to leverage on DB Design’s capabilities to expand its product offerings and customer portfolio in the semiconductor and electronics spaces.

AEM’s Executive Chairman Loke Wai San commented, “We are thrilled that the team at DB Design is now part of our AEM family. Not only does DB Design have an impressive list of semiconductor customers for their lab handler and custom kits, they also bring tremendous design and application engineering capabilities for AEM’s consumables business, and local support to our North American based customers. We are now able to offer almost 24-hour R&D services to our customers leveraging our US and Asia based teams, as well as rapid prototyping and supply chain resiliency via high mix production run support in the US.”
